PROFESSIONAL SUMMARY

Full-stack web developer and digital product specialist with 14+ years of experience across web development, UX/UI, CMS platforms, e-commerce, and digital production. Combines hands-on front-end development with practical back-end customization, API/marketing-platform integrations, analytics, and performance optimization. Currently uses generative AI and AI-assisted coding tools including Copilot, Claude Code, Codex and Google ai studio, to accelerate development and problem-solving. Brings a product-minded approach: translating business needs into usable interfaces, reusable web systems, and measurable digital outcomes. Experienced collaborating across creative, marketing, and technical teams and explaining web technologies to learners and stakeholders.

TECHNICAL SKILLS

Full-stack & web development: HTML5, CSS3, JavaScript/ES6, jQuery, PHP, React, Node.js, Python, responsive UI, DOM manipulation, REST/JSON.
AI-assisted development: Claude Code, Codex; AI-supported coding, debugging, research, and workflow acceleration

APIs & Data: REST APIs, third-party API integrations, JSON data exchange and transformation, SQL queries and database record management; MySQL, PostgreSQL, MongoDB.

AI Integration: AI-assisted development using ChatGPT, Claude Code, and Codex; connecting AI tools and models with business data and existing digital workflows.

Web platforms & dynamic content: WordPress, Elementor, Drupal, HubSpot CMS, SharePoint, Shopify, Crocoblock/JetEngine, custom post types and templates

Integrations & digital operations: Google Tag Manager, GA4, HubSpot, Mailchimp, Mapbox, tracking implementation, CRM/marketing automation

Product experience & delivery: UX/UI, Figma, Adobe XD, accessibility/usability, SEO, web performance, cross-browser testing, reusable page systems

Tools & collaboration: Git/GitHub, Asana, Jira, Adobe Creative Suite, stakeholder collaboration, technical training and mentoring

PROFESSIONAL EXPERIENCE

Web Designer & Web Developer | *Oct 2022 – Present*

Avenue Living Asset Management | Calgary, AB

- Lead technical implementation and ongoing management of multiple corporate websites, partnering with creative and marketing stakeholders to deliver digital experiences aligned with business objectives.
- Build responsive interfaces, campaign landing pages, reusable templates, and scalable content systems using HTML, CSS, JavaScript/jQuery, WordPress, Elementor, Drupal, HubSpot CMS, and SharePoint.
- Integrate websites and digital workflows with third-party services, handling API requests and JSON data to support connected digital experiences and business processes.
- Use AI-assisted development tools to accelerate coding and debugging and explore opportunities to connect AI tools with business data and existing workflows.
- Develop custom WordPress functionality with PHP and Crocoblock/JetEngine, including custom post types and dynamic content features.
- Implement and maintain marketing technology and analytics workflows using HubSpot, Mailchimp, Google Tag Manager, and Google Analytics 4 to support campaign measurement and lead generation.

- Optimize usability, SEO, performance, and cross-browser behavior; troubleshoot publishing, indexing, layout, and front-end issues across production websites.
- Use ChatGPT, Claude Code, and Codex as AI-assisted development tools to accelerate research, coding, debugging, and digital production.
- Act as the creative team's primary web specialist, translating requests into implementation plans and advising colleagues on web design and development best practices.

Graphic Designer and Webmaster | *Jul 2022 – Sep 2024*

Paul's Bakery | Vancouver, BC

- Designed digital and print campaign assets, social content, packaging concepts, and promotional materials.
- Maintained website content and promotional graphics, supporting brand consistency and customer engagement.

Graphic Designer / E-commerce Web Developer | *Oct 2021 – Jun 2022*

MoltonRox Solutions Inc. | Surrey, BC

- Designed and developed e-commerce experiences using React and Shopify, with attention to performance, loading speed, and SEO.
- Created brand identity, packaging, and digital assets for products distributed through retailers including Walmart, London Drugs, and Amazon.

Web Development Instructor | *Apr 2021 – Oct 2021*

Devf | Mexico

- Taught HTML5, CSS3, JavaScript, and React through hands-on lessons, coding exercises, and practical projects.
- Mentored learners in debugging, responsive design, problem-solving, and front-end development practices.

WorldSkills Web Technologies Expert | *May 2018 – Dec 2020*

Workskills | Bogotá, Colombia

- Trained and mentored competitors for national and international web technology competitions.
- Developed training programs covering HTML, CSS, JavaScript, responsive design, and modern web development practices; served as a jury member at WorldSkills International Competition in Kazan, Russia (2019).

Graphic Design & Multimedia Instructor | *Nov 2014 – Dec 2020*

SENA | Bogotá, Colombia

- Delivered instruction in graphic design, front-end development, web usability, interface design, and digital technologies.
- Integrated SEO, Google Analytics, and practical digital production concepts into coursework.

Web Designer & Web Developer | *Jul 2013 – Nov 2014*

Webhouse | Bogotá, Colombia

- Led web design delivery for client websites, developing responsive front ends with HTML5, CSS, and JavaScript.
- Implemented and customized WordPress and Joomla websites and contributed to improvements associated with approximately 25% growth in client online revenue.

Earlier experience | *2007 – 2013*

BBB Equipos; Imágenes y Textos | Bogotá, Colombia

- Produced brand, promotional, print, event, and web graphics, building a foundation in visual communication and digital production.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT
